

Assignment Notes

Sheets Provided:

1. County Lookup:

- Contains the names and a list of counties.

2. Agent Lookup:

- Includes the names and details of sales agents, along with their relevant counties of operation.

3. Biochar Sales:

- Contains details about farmers who purchased biochar fertilizer.
- **Note:** The paid_today column records the payment amounts.

4. Parasitoid Sales Orders:

- Includes details of customers who ordered parasitoids (natural enemies for Fall Armyworm).
- **Note:** Each parasitoid card costs Kshs. 299. Use the order_amount column for calculations.

5. Parasitoids Payment:

- Contains payment amount details for parasitoid orders.

Requirements:

1. All Pivot Tables:

- Place all pivot tables in a single sheet named “**pivot_table**”.
- Save and submit your Excel workbook via email to **brianotieno@plantvillage.ke**.
- Use the following file naming format: “**your_name_excel_response**”.

Part 1: Biochar Fertilizer Sales Summary

Develop a pivot table to summarize **biochar fertilizer sales**, showing the following:

1. **Metrics to Display:**

- **Total revenue expected** from each agent. *(10 points)*
- **Total revenue received** from each agent. *(10 points)*
- **Total biochar fertilizer bags sold** by each agent. *(10 points)*
- **Total remaining balance** for each agent. *(10 points)*

2. **Grouping and Sorting:**

- Group the data by **county**.
- Within each county, arrange the agents in order of sales, starting with the **agent with the highest expected revenue** to the lowest. *(3 points)*
- Include **subtotals below each county** followed by a blank line. *(5 points)*

3. **Additional Notes:**

- Provide a brief note summarizing any **relevant observation** from the pivot table. *(2 points)*
-

Part 2: Parasitoid Sales Summary

Develop a pivot table to summarize **parasitoid sales**, showing the following:

1. **Metrics to Display:**

- **Total revenue expected** from each agent. *(10 points)*
- **Total revenue received** from each agent. *(10 points)*
- **Total remaining balance** for each agent. *(10 points)*
- **Total parasitoid cards sold** by each agent. *(10 points)*

2. **Grouping and Sorting:**

- Group the data by **county**.
- Within each county, arrange the agents in order of sales, starting with the **agent with the highest expected revenue** to the lowest. *(3 points)*
- Include **subtotals below each county** followed by a blank line. *(5 points)*

3. **Additional Notes:**

- Provide a brief note summarizing any **relevant observation** from the pivot table.
(2 points)

What to Submit:

- A copy of your Excel workbook.
- File naming format: “**your_name_excel_response**”.

Example of Pivot table outlook:

County	product_revenue_expected	product_revenue_received	product_remaining_balance	product_qty_ordered
County A				
Agent A	Kshs. XXX	Kshs. XXX	Kshs. XXX	AA
Agent B	Kshs. XXX	Kshs. XXX	Kshs. XXX	AA
Agent C	Kshs. XXX	Kshs. XXX	Kshs. XXX	AA
County A Sub_total	Kshs. XXX	Kshs. XXX	Kshs. XXX	AAA
County B				
Agent 1	Kshs. XXX	Kshs. XXX	Kshs. XXX	AA
Agent 2	Kshs. XXX	Kshs. XXX	Kshs. XXX	AA
Agent 3	Kshs. XXX	Kshs. XXX	Kshs. XXX	AA
County B Sub_total	Kshs. XXX	Kshs. XXX	Kshs. XXX	AAA
Grand Total	Kshs. XXX	Kshs. XXX	Kshs. XXX	AAA
