

Additional resources: Classifier model selection

Â© ExploreAI Academy

This reference document is designed to complement and enhance the material we have covered in the Classifier model selection lesson.

References:

1. An example of how to visually compare classifiers using Scikit-learn in Python.
 - [Scikit-learn tutorial on visualisation](#)
2. A tutorial on improving model performance using cross-validation in Python (and R).
 - [Cross-validation tutorial](#)
