

FiS Milestone #7 Worksheet

Step 1: The Future of Work

Please copy and paste your response from the [Future of Work Activity](#) into the box below.

In this activity, you:

1. Identified your niche and researched the latest trends in your field.
2. Wrote a short paragraph summarizing the key points you found in your research.
3. Searched and registered for an online event related to the future of work on Eventbrite or LinkedIn.

Step 1a: Paste the summary of your article/blog here:

The demand for data analysis and data science professionals continues to grow rapidly. As organizations increasingly rely on data-driven decision-making, the need for skilled individuals who can extract insights and make sense of complex data sets has become paramount. This trend is driven by advancements in technology, the proliferation of big data, and the recognition of the value that data-driven insights bring to businesses across various sectors.

Machine learning and artificial intelligence (AI) are playing an increasingly significant role in data analysis. The ability to leverage machine learning algorithms and AI models to automate data processing, prediction, and classification tasks has proven to be invaluable. This trend is transforming traditional data analysis approaches and enabling more efficient and accurate analysis, thus enhancing decision-making processes.

Ethical considerations and data privacy are becoming crucial aspects of data analysis. With the growing concern for data misuse and breaches, organizations are placing greater emphasis on ensuring the ethical use of data and protecting individuals' privacy. As a data analyst or data scientist, it is important to stay updated on regulations, best

practices, and ethical frameworks surrounding data privacy and security.

To further expand my knowledge and stay abreast of the future of work in the data analysis and data science field, I have searched and registered for an online event on Eventbrite titled "Future of Data Science and Analytics." This event brings together industry experts, thought leaders, and practitioners to discuss emerging trends, technologies, and the evolving role of data professionals in the workplace. I look forward to attending the event and gaining valuable insights that will enhance my expertise in this dynamic field.

Step 1b: Paste the link to the online event here:

[Data Science + Discovery – Modern Analytics Executive Boot Camp Tickets, Tue, Apr 30, 2024 at 10:00 AM | Eventbrite](#)

Step 2: Mapping Your Network

Locate your [Updated Personal Career Workbook](#) from [this activity](#).

Cross-check and ensure you have **added at least 4 people you know in your network who can help you with your job search**. For example, your friend who works in HR can review your resume, or your uncle, a manager, can introduce you to his colleagues. We also provided an example in the worksheet.

Name	Surname	Who Are They to Me?	Category of the connection?	Level of Connection?	How Can They Help Me?	What is the Best Way to Contact Them?	Will I reach out to them this week?	Status (Reached out or not)	Comments
Alex	Bernard	Old friend from college	Fellow Alumni	Middle Circle	Recommend 5 organizations I can apply to in the cybersecurity space	Email and/or Facebook	Yes	Message Sent	Lots of great memories together in uni!

Next, paste the link below. Make sure the document is viewable by anyone with the link.

Step 3: Review This Cover Letter

Next, please copy and paste the paragraph from [this Activity](#) where you reviewed this cover letter.

Dear Sir/Madam,

Hello! Please find my resume attached in response to the Management Associate position posted on your website. As you probably saw, I'm Brandon. Why did I sign up for this position? Well, I'm going to cut to the chase here: I think I'm born to be a Management Associate after reading the requirements in your advertisement.

To give you a snapshot of who I am: I'm relaxed, I'm friendly, and I'm SUPERB at working with people! In fact, my friends often tell me I'm "a people person"! LOL. But there are a few things the resume doesn't show, and I think they are very important for you to know as well.

I have the drive to excel in this position and I put 110% effort into all that I do. I am skilled at project management, marketing, and working under intense deadlines. I work great in a team and I am comfortable working independently as well. My FYP supervisor had commended me on my research skills too. I have outstanding organisational skills and am dynamically trained in Microsoft Office programmes. My professionally-relevant hobbies include photography and web development. I have lived in various countries and it gives me a unique perspective that I bring to my work. It also may be of interest to you that I was the Hall King of XYZ Hall in 2019 — yup, I'm a looker!

In short, if you are looking to have a smart, creative, good-looking, and detail-oriented genius in your team, I am your guy.

I would love to share with you how my skills and ideas can benefit your company in an interview with yourself or the director.

Thanks for your consideration; I look forward to hearing from you soon!

Sincerely,
Brandon

P.S. I only apply to companys that I'm highly interested in.

Ensure that your paragraphs clearly state if the cover letter is good or bad and provide your reasons for your answer.

Step 3: Review This Cover Letter

To improve the cover letter, it is recommended to:

Keep the cover letter concise: Focus on highlighting the most relevant skills, experiences, and achievements that align with the job requirements. Avoid unnecessary details or lengthy paragraphs that may cause the employer to lose interest.

Use a clear and organized structure: Divide the cover letter into distinct sections such as

an introduction, key skills and experiences, and a closing paragraph. This allows the employer to easily navigate through the letter and grasp the main points.

Address the employer professionally: Begin the letter with a formal salutation such as "Dear Hiring Manager" or "Dear [Company Name] Team." Avoid using overly casual language or informal greetings that may undermine the professional tone.

Provide specific examples: Instead of making general statements, support your claims with specific examples of how your skills and experiences have contributed to previous projects or achievements. This helps to demonstrate your capabilities and adds credibility to your application.

Proofread for clarity and grammar: Ensure that the cover letter is free from grammatical errors, typos, and awkward phrasing. Proofreading the content helps to maintain a professional and polished impression.

Step 4: Cover Letter

Paste the cover letter you wrote for the job you found on LinkedIn in [this activity](#).

Make sure your cover letter should be no more than one page and should include the following:

An introduction that explains why you are interested in the job and the company.

- A brief overview of your relevant experience and skills.
- An explanation of why you would be a good fit for the job and the company.
- A closing statement that thanks the employer for considering your application.

Step 4: Cover Letter

Dear Madam/Sir,

I am writing to express my keen interest in the position of Field Programs Director. Upon reviewing the job descriptions for the position, I am confident that my experience and expertise make me a strong candidate for the role.

Throughout my tenure, I have worked as Implementation manager, IT support, Senior System Analyst and Product Manager, gaining valuable insights and knowledge along the way. I have been involved in many software solutions development, deployment and Implementations. This experience has afforded me the opportunity to establish deep working relationships and acquire a comprehensive knowledge base, encompassing both technical aspects and the intricacies of collaborating other organizations , within teams and across teams.

Working on various products, including Vaccine Management Systems and Warehouse Management Systems such as mBrana, Dagu, Vitas, PDS, PLITS, SPLPMS and others, I have honed my ability to quickly

understand new products, processes, and effectively solve root problems. This has equipped me with a shorter learning curve and the capability to bring value and innovation to your organization.

I am confident that my expertise and track record make me a valuable asset to your team. I would welcome the opportunity to contribute my skills and drive successful project outcomes. Thank you for considering my application.

Sincerely,
