Subject: Urgent: Submission of Marketing Strategy Document for ReadingRise

Dear Thandeka,

I hope this message finds you well. I am writing to follow up on the marketing strategy document for ReadingRise, our upcoming educational app.

As you might recall, we are preparing a funding proposal for the Mastercard Foundation, which includes your comprehensive marketing strategy for ReadingRise. Your expertise and insights are crucial for this proposal, and we have been eagerly awaiting the 2-page overview you promised. Unfortunately, I have not received this document yet.

I understand the pressures and challenges of such complex projects, and I appreciate your dedication and hard work. However, considering the deadline for our proposal is in three days, it is imperative that we include your marketing strategy in our submission. Therefore, I kindly request that you submit the document at least one day before our deadline. This will give us enough time to incorporate your strategies into our proposal effectively.

I cannot overstate the importance of your contribution to the success of ReadingRise and our application to the Mastercard Foundation. Your prompt response will be greatly appreciated and will help ensure the success of our collaborative effort.

Thank you for your understanding and cooperation. I am confident that together we can achieve great success with this project and I eagerly await your valuable contribution.

Looking forward to your prompt response.

Warm regards,

Moses Yebei

Product Manager, LearnWave

Activity 2: Networking Part 1.

Main Goal for the Dinner:

My primary goal is to connect with potential employers or individuals who can offer referrals or insights into entry-level roles in my tech specialisation, Machine Learning. To achieve this, I'll research the attendees beforehand, if possible. Understand their backgrounds, current roles, and companies. This will help me identify who might be most relevant to my job search and craft specific questions or conversation topics tailored to their expertise.

Preparation:

- **Relevant Conversation Starters:** Develop a list of open-ended questions related to the tech industry, current trends, and challenges. For example, "What do I think has been the most significant change in Artificial Intelligence over the last year?"
- **Personal Introduction:** Craft a concise and compelling introduction for myself. It should include my name, my specialization, a brief mention of my recent graduation from ALX, and my current career aspirations.
- **Mutually Beneficial Asks:** Think about what I can offer in return when I ask for help or referrals. It could be my willingness to volunteer, share my recent learnings, or contribute to a project.

Key Takeaways from the Article and Application:

- **Clear Goal in Mind:** Keep focused on connecting with people who can provide job leads or advice.
- **Asking About Others:** Show genuine interest in others' work and experiences. This builds rapport and makes it memorable.
- **Graceful Exit:** Have a polite exit strategy ready for when conversations naturally conclude, allowing me to move on and meet others.

Conversation Starters and Asks for the Dinner:

1. **Starters:** "What inspired me to enter data science?"; "What projects are I currently excited about in my work?"
2. **Asks:** After establishing a connection, I might say, "I'm currently seeking entry-level opportunities in data science. Do I know of any openings in my network, or could I provide advice on breaking into this area?"
3. **Offering in Return:** "I'd be happy to share my insights from the latest courses I've completed in deep Learning or assist in any upcoming projects I might have."
